Q: What is the meaning of Fresh Karma?

A: Karma relates to understanding how our intentions, motives, desires and the emotional drive with which we conduct our actions have an effect on our lives and how they are related to the term “Karma”. Karma in Sanskrit means deed or action. It includes actions that we do, not only through our body, but also through speech and mind. Karma is also referred to an echo of the past and is also said to create the future. Common acts like going to work, good deeds, charity, etc. are also referred to as Karma in general.

The key reasons for the charging of Karma is the inner intent behind the action and ignorance of the Self. We feel we should all learn to connect to our awareness sense of thought, action and deed.

Q: Are there parabens in any of your products?

A: NO. We use a paraben-free, formaldehyde-free broad-spectrum preservative system in products that require preservatives.

Q: What exactly are pure essential oils?

A: They are concentrated, highly aromatic components of plants & fruits whose molecular structure is close to that of our skin and therefore readily absorbed by the skin. Unlike synthetic additives, essential oils work with our natural body to provide that signature experience which delivers clean, tingly freshness to each person.
